The importance of adopting technology in healthcare has become ever more evident during the current COVID-19 pandemic and Slovenian companies are increasingly at the forefront of developing health tech solutions that are already in use across the globe.

Join our healthcare technology webinar for a unique virtual experience where you can connect with some of the biggest health tech brands in Slovenia who will present their groundbreaking solutions. You will also learn what it is about Slovenia's R&D and business environment that enables companies' success.

### Our guests at the webinar will include:

**Better** - builds powerful digital products that help doctors and nurses treat patients, trusted by leading healthcare institutions in the United Kingdom, the Netherlands, Germany, Russia, Norway, Finland, Italy and more

**Cosylab** - the world leader in controls for particle accelerators, both for Proton Therapy systems and for large-scale experimental physics machines

**UVC Solutions** - its SteriPro device destroys all human known microorganisms such as the new coronavirus in just a few minutes

**Slovenian Innovation HUB** – establishing the right support services for knowledge transfer, intellectual property protection and recognition of Slovenia as a strong global medical/healthcare brand

Register now for free to gain exclusive access to Slovenian tech showcases and case studies, a lively panel debate and networking opportunities.
